KIMBERLEY ACCHS SUCCESS STORIES

SUCCESSFUL QUIT YARNS

At present, both KAMSC Tobacco Project Officer and Dan (photographer) are going through the process of developing a "Success Quit Yarn" from the people who have quit and those who have had surgery relating to tobacco smoking.

With obtaining consent from patients, some stories are collected by doing home visits and recording patients stories in their homes.

Talking to Beagle Bay School students about the dangers of tobacco smoking

On Wednesday 27th August, the KAMSC Tobacco Team (Cathy and Mena) were invited by the Beagle Bay School Principle Mr John.

The Tobacco Team delivered tobacco messages to the school students and encouraged classes to take part in the tobacco activities. The students participated and responded very well. The feedback we received from the school students was very interesting, as they knew some of the dangers of tobacco smoking and what damages tobacco smoking can do to the human body. The students were keen in asking several questions regarding tobacco smoking. The senior class also asked to have some tobacco smoking posters send to the Beagle Bay School.

The talks on tobacco smoking were an eye opener to the school students. The Smoking posters were sent to Beagle Bay School at a later date.

TOBACCO FACT

Around 16,000 people die every year in Australia from tobacco related illness.
